# Reportable Condition Reporting Guidance

Infectious Disease
Epidemiology &
Prevention Division

#### **Condition Name:**

**Arboviral Disease or Infection, Imported** 

### **Condition Name in NBS:**

- Chikungunya Virus Disease
- Dengue Virus,
   Dengue Severe,
   Dengue-like illness.
- Zika Virus Disease,
- Congenital/Non-Congenital
- Zika Virus
   Infection,
   Congenital/Non-Congenital

## TO REPORT:

- For NBS users: Report conditions via Morbidity Report in NBS
- Non-NBS users: Report with <u>this</u> form

## **Reporting Timeframe:**

Within One Working Day

## **Associated Reportable Laboratory Results**

- Isolation of virus from, or demonstration of specific viral antigen or nucleic acid in, tissue, blood, CSF, or other body fluid, EIA, virus-specific quantitative antibody titers. Virus-specific IgM antibodies in CSF or serum.
- If positive, forward specimen to IDOH Labs for further testing. \*If positive, forward to IDOH Labs for further testing.

# **Condition Specific Reporting Details**

• Clinical, Epidemiologic, Lab Report, and Treatment information sections within the NBS Morbidity Report.

## **Additional Documentation to Include**

- Applicable medical records including outpatient office visits, specialty consults, and emergency department/hospital discharge summaries, recent travel history.
- Negative results for other arboviral IgM antibodies or documentation of recent vaccination against a flavivirus (e.g., WNV, YFV, JEV).
- Name and contact information of follow up provider should be listed in the Administrative Comments section of the morbidity report.
